SPINNER-2 CABLE LASHER

Efficiency in Action: The Jameson Spinner-2 Cable Lasher

The Jameson Spinner-2 Cable Lasher efficiently lashes aerial cables with stainless steel wire, featuring a reliable traction-rotation mechanism and an ergonomic top handle for easy handling. Its robust all-metal construction includes interchangeable front opening plates to optimize the lasher to cable bundle size, an exclusive removable front pinch roller, and safety features like reverse release and rotation locking. Count on Jameson for quick delivery, parts and service.

- Reliability and Robust Performance**
Industry-preferred well-known Traction-Rotation mechanism gets you up to speed with no training necessary. And all-metal construction ensures precision and durability.
- Safe Pole Transitions**
Safely transfer the Lasher around poles with the ambidextrous top handle and standard front handle.
- Overlashing Adaptability**
Easily transition between first-time-lashing and over-lashing. The Jameson Lasher features an exclusive removable front pinch roller, and standard interchangeable front opening plates.
- Easy and Simple Reverse Control**
Activate the reverse release mechanism with a flick of the lever for precision control.
- Safety First**
The front cable gate locks all movement, ensuring the Lasher moves only when you want it to.
- Bundle Size Flexibility**
Tightly lash bundles up to 3" in diameter with the vertically and horizontally adjustable rear gate.
